Day: Thursday

Date: 27-02-2025

Venue: Subhas Chandra Bose Block

In today's live session, trainers provided in-depth insights into key web development topics. The session began with an introduction to HTML, covering its basic structure, attributes, and different types of elements. Trainers also explained how to incorporate images, audio, and video into web pages using the respective tags. Moving forward, the session covered multimedia tags, the fundamentals of CSS, how to use external CSS, and the importance of CSS properties and selectors for styling web pages effectively. Next, trainers demonstrated how to set background images on a webpage and provided a detailed explanation of list tags, including ordered lists () and unordered lists (), along with their applications in web design. The session also delved into the table structure in HTML, focusing on

<table>, <tr>, and <td> tags, explaining their role in organizing and displaying data. Additionally, trainers introduced the <link> tag for linking external resources and the <button> tag for creating interactive elements.

Day 3 concluded successfully with insightful guidance from trainers, active engagement from students, and effective supervision by faculty, ensuring a productive learning experience
